

BUET Knowledge Base

Bangladesh University of Engineering and Technology (BUET)

BUET is the premier engineering institution in Bangladesh, with a history that stretches back to 1876 when it was founded as the Dacca Survey School during the British Raj. It was renamed Ahsanullah School of Engineering in 1908, became Ahsanullah Engineering College in 1947, was upgraded to East Pakistan University of Engineering and Technology in 1962, and finally became BUET after Bangladesh's independence. This 91-acre campus in the Palashi area of Dhaka is hallowed ground for engineering education in the country.

The university admits only 1,305 undergraduate students each year from tens of thousands of applicants, giving it an acceptance rate of roughly one to two percent. Its 579 faculty members teach 18 departments across 6 faculties: Chemical and Materials Engineering, Civil Engineering, Electrical and Electronic Engineering, Mechanical Engineering, Science, and Architecture and Planning. The university also houses 8 research institutes including the Institute of Water and Flood Management, the Institute of Information and Communication Technology, the Accident Research Institute, and the Institute of Robotics and Automation in Bangladesh.

The faculty roster reads like a who's who of Bangladeshi engineering. In CSE, professors like Dr. Muhammad Abdullah-Al-Wadud, Dr. Md. Shohrab Hossain, and Dr. A.K.M. Ashikur Rahman lead research in machine learning, cybersecurity, and algorithms. The EEE department includes Dr. Md. Shahjahan and Dr. Md. Saiful Islam, while Mechanical Engineering is led by figures like Dr. Md. Ehsan and Dr. Md. Zahurul Haque. Civil Engineering boasts Dr. Md. Mujibur Rahman and Dr. Tahmeed M. Al-Hussaini, and Industrial and Production Engineering counts Dr. M. Ahsan Akhtar Hasin among its faculty.

Undergraduate admission requires outstanding academic credentials. Candidates typically need a GPA of 5.0 in both SSC and HSC, and the written admission test covers mathematics, physics, chemistry, and English. The application fee is around BDT 1,500. For graduate programs, BUET offers MSc Engineering, MEngg, MArch, MURP, MPhil, and PhD degrees, requiring a relevant bachelor's degree with a strong CGPA, followed by a written test and interview.

As a public university, tuition is remarkably low at approximately BDT 274 per semester. Hall charges, lab fees, and library fees are all nominal. BUET offers various trust fund scholarships, government merit scholarships, and research fellowships for graduate students that provide monthly stipends. The university's Bureau of Research, Testing and Consultation provides industry consultancy services and generates additional revenue for research.

Student clubs at BUET reflect its technical focus. The BUET Computer Club, Robotics Society, IEEE Student Branch, SAE Collegiate Club, and Innovation and Entrepreneurship Club are particularly active. But

the university also has thriving cultural and arts scenes through its Debating Society, Cultural Society, Photographic Society, Film Society, Architecture Society, and Adventure Club. Sports clubs cover cricket, football, basketball, and athletics. The central library was renamed Shahid Abrar Fahad Library in 2025, honoring a student tragically killed in 2019.

Recent years have seen significant activism at BUET. The Engineering Rights Movement in 2026 saw students protesting against discrimination in engineering recruitment, with a police crackdown drawing national attention. In 2025, a BUET student was arrested under the Cyber Security Act for a Facebook post criticizing the university administration, sparking campus-wide protests. Hall fee hikes also led to demonstrations in 2025. Most significantly, the 2019 murder of BUET student Abrar Fahad by Bangladesh Chhatra League members led to massive nationwide protests, temporary closure of all residential halls, and a lasting impact on campus politics.

BUET consistently ranks as the number one university in Bangladesh. In QS World University Rankings 2026, it is placed at 761-770 globally with a QS Asia ranking of 165, both first in Bangladesh. THE World University Rankings place it at 1001-1200. EduRank puts it at second in Bangladesh and 1209th globally. Faculty and staff recruitment notices are regularly published on the university website.

Admission Process

Admission to BUET's undergraduate programs is among the most competitive in Bangladesh. For the 2025-26 academic session, the online application period ran from November 16 to December 2, 2025, with the admission test held on January 10, 2026. The eligibility criteria require applicants to have completed SSC (or equivalent) in 2022 or 2023 and HSC (or equivalent) in 2024 or 2025. Minimum GPA requirements include GPA 4.00 out of 5.00 in SSC (science group with Mathematics, Physics, Chemistry) and GPA 5.00 in HSC with 5.00 in Higher Math, Physics, and Chemistry individually. For GCE O-Level and A-Level candidates, minimum B grades in five O-Level subjects (including Math, Physics, Chemistry, English) and minimum A grades in Math, Physics, and Chemistry at A-Level are required. The admission process has two stages: a preliminary screening test (preliminary exam) and a main written exam. The screening allows the top 18,000 eligible candidates (based on HSC subject GPA) to sit for the preliminary MCQ exam. From the preliminary round, approximately 6,000 candidates qualify for the main written exam. The admission test is of 400 marks with 40 questions carrying 10 marks each (13 from Physics, 13 from Chemistry, and 14 from Mathematics) taken within 2 hours. A total of 1,309 seats are available (including reserved seats). The application fee is Tk 1,300 for Group KA (Engineering and URP) and Tk 1,500 for Group KHA (Engineering, URP, and Architecture). For foreign nationals, there are 26 seats with a separate application process through their country's foreign ministry. For non-SAARC countries, the admission fee is \$200 USD and course registration fee is \$50 USD per credit hour. The application process is fully online at ugadmission.buet.ac.bd. Required documents include SSC and HSC certificates and grade sheets, passport-size photographs, and for foreign students, IELTS (minimum 6.0) or TOEFL (minimum 60) scores. Architecture applicants must also pass a freehand drawing and visual-spatial intelligence test.

Degrees Offered

BUET offers a comprehensive range of engineering, architecture, urban planning, and science degrees at undergraduate, graduate, and doctoral levels. At the undergraduate level, four-year BSc Engineering degrees are offered in Civil Engineering, Water Resources Engineering, Electrical and Electronic Engineering, Computer Science and Engineering, Biomedical Engineering, Mechanical Engineering, Chemical Engineering, Materials and Metallurgical Engineering, Naval Architecture and Marine Engineering, Industrial and Production Engineering, and Nanomaterials and Ceramic Engineering. A five-year Bachelor of Architecture (BArch) degree is also offered, along with a four-year Bachelor of Urban and Regional Planning (BURP). At the graduate level, the university offers MSc (Master of Science), MSc Engg (Master of Science in Engineering), MEngg (Master of Engineering), MArch (Master of Architecture), MURP (Master of Urban and Regional Planning), and MPhil (Master of Philosophy) degrees. Specialized master's programs include MSc in Biochemical Technology, Occupational Process Safety, Energy Technology and Management, Advanced Engineering Management, Materials Science, Glass and Ceramic Science, Climate Modeling and Risk Management, Humanitarian Engineering, Information and Communication Technology, Information Security, Management of Technology, Nuclear Power Engineering, Disaster Risk Reduction Engineering, and more. Doctoral degrees (PhD) are offered in all engineering departments and institutes including Architecture, Chemical Engineering, Chemistry, Civil Engineering, Computer Science and Engineering, Electrical and Electronic Engineering, Industrial and Production Engineering, Mathematics, Mechanical Engineering, Materials and Metallurgical Engineering, Naval Architecture and Marine Engineering, Petroleum and Mineral Resources Engineering, Physics, Urban and Regional Planning, Water Resources Engineering, Nanomaterials and Ceramic Engineering, Biomedical Engineering, and through the Institute of Water and Flood Management and the Institute of Information and Communication Technology. Postgraduate Diplomas are offered in Information Technology and Water Resources Development.

Faculties and Departments

BUET comprises five faculties and 18 departments. The Faculty of Chemical and Materials Engineering includes the Department of Chemical Engineering (ChE), the Department of Materials and Metallurgical Engineering (MME), the Department of Nanomaterials and Ceramic Engineering (NCE), and the Department of Petroleum and Mineral Resources Engineering (PMRE). The Faculty of Civil Engineering includes the Department of Civil Engineering (CE) and the Department of Water Resources Engineering (WRE). The Faculty of Electrical and Electronic Engineering includes the Department of Electrical and Electronic Engineering (EEE), the Department of Computer Science and Engineering (CSE), and the Department of Biomedical Engineering (BME). The Faculty of Mechanical Engineering includes the Department of Mechanical Engineering (ME), the Department of Naval Architecture and Marine Engineering (NAME), and the Department of Industrial and Production Engineering (IPE). The Faculty of Architecture and Planning includes the Department of Architecture (Arch), the Department of Urban and Regional Planning (URP), and the Department of Humanities (offers service courses, no degree programs). The Faculty of Science includes the Department of Chemistry, the Department of Mathematics, and the Department of Physics, which offer postgraduate programs only. Additionally, BUET has eight institutes: the Institute of Water and Flood Management (IWFM), the Institute of Information and Communication Technology (IICT), the Institute of Appropriate Technology (IAT), the Institute of Nuclear Power Engineering (INPE),

the BUET-Japan Institute of Disaster Prevention and Urban Safety (JIDPUS), the Accident Research Institute (ARI), the Research and Innovation Centre for Science and Engineering (RISE), and the Biomedical Engineering Technology Centre. The Department of Civil Engineering is the largest department, with approximately 800 undergraduate and 400 graduate students and 65 faculty members, comprising four divisions: Structural Engineering, Environmental Engineering, Transportation Engineering, and Geotechnical Engineering.

Faculties and Departments (Detailed)

Detailed information about all faculties and departments at Bangladesh University of Engineering and Technology (BUET) is provided below.

Faculty of Civil Engineering — established in —. Dean: Prof. Dr. Md. Abdul Jalil. Contact: deance@ce.buet.ac.bd, +88-02-8616250.

Department of Civil Engineering (CE): Head: Prof. Dr. Ishtiaque Ahmed (iahmed@ce.buet.ac.bd) Offers BSc Engineering, MSc Engineering, MEngg, PhD. Faculty strength: approximately 65. Key research areas include Structural engineering; Environmental engineering; Transportation engineering; Geotechnical engineering; Earthquake engineering. Notable faculty: Prof. Dr. A. B. M. Badruzzaman (Environmental Eng., VC of BUET); Prof. Dr. Md. Abdul Jalil (Environmental Eng.); Prof. Dr. Ishtiaque Ahmed (Structural Eng.); Prof. Dr. Khan Mahmud Amanat (Structural Eng.); Prof. Dr. Mehedi Ahmed Ansary (Geotechnical Eng.). Facilities: Structural Engineering Lab, Environmental Engineering Lab, Transportation Lab, Geotechnical Lab, Concrete Lab, Materials Testing Lab, CAD Lab

Department of Water Resources Engineering (WRE): Head: — (headwre@wre.buet.ac.bd) Offers BSc Engineering, MSc Engineering, MEngg, PhD. Faculty strength: approximately 20. Key research areas include Hydrology; Hydraulics; Flood management; River engineering; Water resources planning. Notable faculty: Prof. Dr. Anisul Haque (Water Resources); Prof. Dr. M. Monirul Qader Mirza (Hydrology). Facilities: Hydraulics Lab, Hydrology Lab, River Modeling Lab, GIS Lab, Fluid Mechanics Lab

Faculty of Electrical and Electronic Engineering — established in 1982. Dean: Prof. Dr. Md. Shafiqul Islam. Contact: deaneeee@eee.buet.ac.bd, islams@eee.buet.ac.bd, +88-02-8618377.

Department of Electrical and Electronic Engineering (EEE): Head: Prof. Dr. Sharif Mohammad Mominuzzaman (headeeee@eee.buet.ac.bd, momin@eee.buet.ac.bd, +88-02-5515548) Offers BSc Engineering, MSc Engineering, MEngg, PhD. Faculty strength: approximately 93. Key research areas include Power systems; Electronics; Telecommunications; Signal processing; Control systems. Notable faculty: Prof. Dr. Md. Shafiqul Islam (Dean FEEE); Prof. Dr. Sharif Mohammad Mominuzzaman (Head); Prof. Dr. Pran Kanai Saha (VLSI); Prof. Dr. Celia Shahnaz (Signal Processing); Prof. Dr. Shaikh Anowarul Fattah (Signal Processing). Facilities: Power Systems Lab, Electronics Lab, Communication Lab, Control Systems Lab, Microprocessor Lab, VLSI Design Lab, Optoelectronics Lab, High Voltage Lab, Renewable Energy Lab

Department of Computer Science and Engineering (CSE): Head: Prof. Dr. Tanzima Hashem (headcse@cse.buet.ac.bd, tanzimahashem@cse.buet.ac.bd, +880-2-55155097) Offers BSc Engineering, MSc Engineering, MEngg, PhD, PGD in AI & ML, PGD in Data Science, PGD in Cybersecurity, PGD in Software Engineering. Faculty strength: approximately 50. Key research areas include Algorithms and Theory; Artificial Intelligence; Machine Learning; Data Science; Cybersecurity. Notable faculty: Prof. Dr. Tanzima Hashem (Head, Data Science); Prof. Dr. Md. Saidur Rahman (Graph Theory); Prof. Dr. M. Kaykobad (Algorithms); Prof. Dr. Md. Mostofa Akbar (Networking); Prof. Dr. Atif Hasan Rahman (Bioinformatics). Facilities: AI & ML Lab, Data Science Lab, Cybersecurity Lab, Networking Lab, Database Lab, Software Engineering Lab, High Performance Computing Lab

Department of Biomedical Engineering (BME): Head: Prof. Dr. Taufiq Hasan (headbme@bme.buet.ac.bd, +880-2-55167100 Ext. 6596) Offers BSc Engineering, MSc Engineering, PhD. Faculty strength: approximately 15. Key research areas include Biomedical signal processing; Medical imaging; Biomechanics; Biomaterials; Neural engineering. Notable faculty: Prof. Dr. Taufiq Hasan (Head, Biomedical Signal Processing); Dr. Jahid Ferdous (Biomedical Engineering). Facilities: Biomedical Signal Processing Lab, Medical Imaging Lab, Biomaterials Lab, Biomechanics Lab, Neural Engineering Lab

Faculty of Mechanical Engineering — established in —. Dean: Prof. Dr. Md. Zahurul Haq. Contact: deanme@me.buet.ac.bd, +88-02-8616047.

Department of Mechanical Engineering (ME): Head: Prof. Dr. Muhammed Mahbubur Razzaque (mmrazzaque@me.buet.ac.bd) Offers BSc Engineering, MSc Engineering, MEngg, PhD. Faculty strength: approximately 45. Key research areas include Thermodynamics; Fluid mechanics; Heat transfer; Manufacturing; Robotics. Notable faculty: Prof. Dr. Muhammed Mahbubur Razzaque (Head); Prof. Dr. Md. Zahurul Haq (Dean FME); Prof. Dr. Md. Maksud Helali (Automotive); Prof. Dr. Md. Rafiqul Islam (Thermal Engineering). Facilities: Thermodynamics Lab, Fluid Mechanics Lab, Heat Transfer Lab, Manufacturing Lab, IC Engine Lab, Robotics Lab, Metrology Lab, CFD Lab, CAD/CAM Lab

Department of Industrial and Production Engineering (IPE): Head: Prof. Dr. Prianka Binte Zaman (prianka@ipe.buet.ac.bd) Offers BSc Engineering, MSc Engineering, MEngg, PhD. Faculty strength: approximately 20. Key research areas include Operations research; Supply chain management; Quality engineering; Production planning; Ergonomics. Notable faculty: Prof. Dr. Prianka Binte Zaman (Head, IPE); Prof. Dr. Md. Kutub Uddin (Operations Research). Facilities: Production Lab, CAD Lab, Ergonomics Lab, Simulation Lab, Quality Control Lab

Department of Naval Architecture and Marine Engineering (NAME): Head: — (headname@name.buet.ac.bd, +8802223363605) Offers BSc Engineering, MSc Engineering, MEngg, PhD. Faculty strength: approximately 20. Key research areas include Ship design; Marine engineering; Ocean engineering; Hydrodynamics; Shipbuilding. Notable faculty: Prof. Dr. Md. Mashud Karim (Naval Architecture); Prof. Dr. Goutam Kumar Saha (Marine Engineering). Facilities: Ship Model Testing Lab, Hydrodynamics Lab, Marine Engineering Lab, CAD Lab, Strength of Materials Lab, Computer Lab

Faculty of Chemical and Materials Engineering — established in —. Dean: Prof. Dr. A. K. M. Bazlur Rashid. Contact: dean.cme@cmebuet.ac.bd.

Department of Chemical Engineering (ChE): Head: Prof. Dr. Shoeb Ahmed (shoebahmed@che.buet.ac.bd, +880-2-966-5609) Offers BSc Engineering, MSc Engineering, MEngg, PhD. Faculty strength: approximately 25. Key research areas include Chemical reaction engineering; Process design; Catalysis; Biochemical engineering; Separation processes. Notable faculty: Prof. Dr. Shoeb Ahmed (Head, Chemical Eng.); Prof. Dr. Md. Zahangir Alam (Biochemical Eng.); Prof. Dr. Nahid Sanzida (Process Design). Facilities: Chemical Reaction Lab, Process Control Lab, Unit Operations Lab, Biochemical Eng. Lab, Polymer Lab, Catalysis Lab, Analytical Lab

Department of Materials and Metallurgical Engineering (MME): Head: Prof. Dr. H. M. Mamun Al Rashed (headmme@mme.buet.ac.bd, hrashed@mme.buet.ac.bd, +880-2-55666000 Ext. 7369/7352) Offers BSc Engineering, MSc Engineering, MEngg, PhD. Faculty strength: approximately 20. Key research areas include Physical metallurgy; Mechanical metallurgy; Extractive metallurgy; Corrosion engineering; Ceramics. Notable faculty: Prof. Dr. H. M. Mamun Al Rashed (Head MME); Prof. Dr. A. K. M. Bazlur Rashid (Dean FCME); Prof. Dr. Khandaker Md. Shafiul Islam (Ceramics). Facilities: Metallography Lab, Heat Treatment Lab, Foundry Lab, Welding Lab, Mechanical Testing Lab, Corrosion Lab, Materials Characterization Lab (SEM, XRD, EDX)

Department of Nanomaterials and Ceramic Engineering (NCE): Head: — (headnce@nce.buet.ac.bd) Offers BSc Engineering, MSc Engineering, MEngg, PhD. Faculty strength: approximately 12. Key research areas include Ceramic engineering; Nanomaterials; Glass technology; Refractories; Ceramic matrix composites. Notable faculty: Prof. Dr. M. Abdul Gafur (Ceramic Engineering). Facilities: Ceramic Processing Lab, Glass Lab, Nanomaterials Lab, Characterization Lab, Powder Processing Lab

Department of Petroleum and Mineral Resources Engineering (PMRE): Head: — (headpmre@pmre.buet.ac.bd) Offers MSc Engineering, MEngg, PhD. Faculty strength: approximately 10. Key research areas include Petroleum engineering; Reservoir engineering; Drilling engineering; Mineral processing; Petroleum geology. Notable faculty: Prof. Dr. Mohammad Asaduzzaman (Petroleum Eng.). Facilities: Reservoir Simulation Lab, Drilling Lab, Geology Lab, Petroleum Testing Lab

Faculty of Science — established in —. Dean: Prof. Dr. Al-Nakib Chowdhury. Contact: deanscience@sci.buet.ac.bd.

Department of Chemistry: Head: Prof. Dr. Abu Bin Imran (abimran@chem.buet.ac.bd) Offers MSc, MPhil, PhD. Faculty strength: approximately 20. Key research areas include Organic chemistry; Inorganic chemistry; Physical chemistry; Analytical chemistry; Polymer chemistry. Notable faculty: Prof. Dr. Abu Bin Imran (Head, Chemistry); Prof. Dr. Al-Nakib Chowdhury (Dean, Faculty of Science). Facilities: Organic Synthesis Lab, Inorganic Lab, Physical Chemistry Lab, Analytical Chemistry Lab, Spectroscopy Lab, Computational Chemistry Lab

Department of Mathematics: Head: — (headmath@math.buet.ac.bd) Offers MSc, MPhil, PhD. Faculty strength: approximately 25. Key research areas include Fluid dynamics; Computational fluid dynamics; Numerical analysis; Graph

theory; Ring and module theory. Notable faculty: Prof. Dr. Md. Abdul Alim (Fluid Dynamics); Prof. Dr. Mohammad Asaduzzaman (Numerical Analysis). Facilities: Computational Mathematics Lab, High Performance Computing Lab

Department of Physics: Head: Prof. Dr. Mohammad Abu Sayem Karal (headphysics@phy.buet.ac.bd) Offers MSc, MPhil, PhD. Faculty strength: approximately 20. Key research areas include Magnetism; Solid state physics; Crystal growth; Polymer physics; Biophysics. Notable faculty: Prof. Dr. Mohammad Abu Sayem Karal (Head, Biophysics); Prof. Dr. A. K. M. Akther Hossain (Multiferroics); Prof. Dr. Md. Mostak Hossain (Crystal Growth); Prof. Dr. Md. Forhad Mina (Polymer Physics); Prof. Dr. Md. Rafi Uddin (Atmospheric Physics). Facilities: Solid State Physics Lab, Crystal Growth Lab, Magnetism Lab, Biophysics Lab, Atmospheric Physics Lab, Polymer Lab, Materials Science Lab

Faculty of Architecture and Planning — established in 1962. Dean: Prof. Dr. Shayer Ghafur. Contact: deanarch@arch.buet.ac.bd, +88-02-8613338.

Department of Architecture (Arch): Head: — (headarch@arch.buet.ac.bd, +88-02-223365633) Offers BArch, MArch, MPhil, PhD. Faculty strength: approximately 25. Key research areas include Architectural design; Urban design; Landscape architecture; Energy and environment; Housing and settlement. Notable faculty: Prof. Dr. Shayer Ghafur (Dean, Architecture); Prof. Khandaker Shabbir Ahmed (Urban Design); Prof. Dr. Zebun Nasreen Ahmed (Environment). Facilities: Design Studio, CAD Lab, Building Science Lab, Materials Lab, Photography Lab, Climate Simulation Lab, Digital Fabrication Lab

Department of Urban and Regional Planning (URP): Head: — (headurp@urp.buet.ac.bd) Offers BSc in Urban & Regional Planning, MSc in URP, MPhil, PhD. Faculty strength: approximately 15. Key research areas include Urban planning; Regional planning; Transportation planning; Housing; Land use planning. Notable faculty: Prof. Dr. Sarwar Jahan (Urban Planning); Prof. Dr. Muhammad Mashfiqul Islam (Transportation Planning). Facilities: GIS & Remote Sensing Lab, Urban Planning Studio, Computer Lab, Transport Planning Lab

Department of Humanities (HUM): Head: — (headhum@hum.buet.ac.bd) Offers Service department - courses for all engineering students. Faculty strength: approximately 15. Key research areas include English language; Economics; Sociology; Law for engineers; Communication skills. Notable faculty: Prof. (Various) - English, Economics, Sociology faculty. Facilities: Language Lab, Economics Lab, Multimedia classrooms

Research Institutes and Centres:

• **Institute of Water and Flood Management (IWFM)** — Director: Prof. Dr. Mohammad Abed Hossain. Contact: diriwm@iwfm.buet.ac.bd, abed@iwfm.buet.ac.bd, +880-2-55167228-57 Ext. 7950. Offers postgraduate diploma, Masters, MPhil, PhD in Water and Flood Management.

• **Institute of Information and Communication Technology (IICT)** — Director: Prof. Dr. Md. Saiful Islam. Contact: diriict@iict.buet.ac.bd, mdsaulislam@iict.buet.ac.bd, +880-2-55167100/6515. Offers PGD in ICT, PGD in Business IT, MSc in ICT, MSc in Information Security, MPhil, PhD.

- **Institute of Appropriate Technology (IAT)** — Director: Prof. Dr. A K M Monjur Morshed. Focuses on appropriate technology for grassroots development.
- **Accident Research Institute (ARI)** — Director: Prof. Dr. Md. Shamsul Hoque. Research on road safety and accident prevention.
- **BUET-Japan Institute of Disaster Prevention and Urban Safety (BUET-JIDPUS)** — Director: Prof. Dr. Tanvir Manzur. Collaboration with Japanese institutions for disaster prevention research.
- **Institute of Nuclear Power Engineering (INPE)** — Director: Prof. Dr. Mohammad Jahangir Alam. Offers programs related to nuclear power engineering.
- **Institute of Energy and Sustainable Development (IESD)** — Director: Prof. Dr. Md. Ali Ahammad Shoukat Choudhury. Focuses on energy research and sustainable development.

Credit System and Duration

BUET operates on a semester system with two semesters per academic year (January and July semesters). The undergraduate programs in Engineering, URP, and Science faculties typically extend over four years (8 semesters) and require a minimum of 157 credit hours for engineering degrees and 190 credit hours for the Bachelor of Architecture (5 years, 10 semesters). The minimum GPA requirement for obtaining a bachelor's degree in engineering, URP, or architecture is 2.20 out of 4.00. Each credit typically represents one hour of lecture per week or two to three hours of laboratory/sessional work per week over a semester. The grading system uses Letter Grades with corresponding Grade Points (A+ = 4.00, A = 3.75, A- = 3.50, B+ = 3.25, B = 3.00, B- = 2.75, C+ = 2.50, C = 2.25, D = 2.00, F = 0.00). Postgraduate programs typically require 24-36 credit hours of coursework plus a thesis/dissertation. Master's programs usually take 1.5-2 years, MPhil programs 2 years, and PhD programs 3-5 years to complete. The academic year typically commences in January. Each department has its own Undergraduate Board of Studies (BUGS) that determines specific credit requirements for its programs.

Tuition and Costs Overview

BUET is one of the most affordable engineering universities in the world due to heavy government subsidies. For Bangladeshi undergraduate students, the total cost for the entire 4-year BSc Engineering program ranges from approximately Tk 20,000 to Tk 35,000. Admission fees (first year) are approximately Tk 12,000-15,000. Semester fees are minimal at around Tk 274-300 per semester. Annual fees are approximately Tk 2,000-4,000 per year. Hall accommodation costs approximately Tk 13,000-14,000 per year, with monthly meal charges of approximately Tk 1,500. The total cost for four years including hall accommodation but excluding food is approximately Tk 60,000. Including food and all expenses, the total for four years is approximately Tk 1,00,000-1,50,000 (about \$1,000-\$1,500 USD). For postgraduate programs, fees are similarly low: admission fee Tk 500, registration fee Tk 500 per semester, course fee per credit Tk 100 (regular) to Tk 500 (engineering), and caution money Tk 1,000-5,000. For foreign students from non-SAARC countries, the admission fee is \$200 USD and course registration is \$50 USD per credit hour. For students from SAARC countries, fees are as per Bangladesh government regulations, similar to local students. The approximate total cost for foreign students is \$86 USD per year for bachelor's and \$20 USD per year for master's programs. Hostel

and living costs for foreign students are approximately \$100 USD per month. BUET's total cost is a fraction of what private engineering universities charge in Bangladesh (e.g., Ahsanullah University charges approximately Tk 96,000 per semester).

Rankings

BUET is consistently ranked as one of the top engineering universities in South Asia. In the QS World University Rankings 2026, BUET was placed in the 761-770 bracket globally (up from 801-850 in 2024), making it the second-highest ranked university in Bangladesh after DU. In the Times Higher Education (THE) World University Rankings 2026, BUET was placed in the 1001-1200 range. In subject-specific rankings, BUET excels significantly: In the QS World University Rankings by Subject 2026, BUET's Engineering and Technology broad subject area was ranked 282nd globally (one of the highest in Bangladesh), Petroleum Engineering was ranked 101-150 globally, Architecture was ranked 201-260, Electrical and Electronic Engineering was ranked 301-350, Computer Science and Information Systems was ranked 451-500, Mechanical, Aeronautical and Manufacturing Engineering was ranked 351-400, and Mathematics was ranked 501-600. In the THE subject rankings 2026, BUET's Engineering and Technology was placed in the 601-800 range, Computer Science in the 601-800 range, and Physical Sciences in the 601-800 range. In the US News Best Global Universities rankings, BUET is ranked approximately 1,408th globally. In terms of alumni prominence (EduRank), BUET is ranked 1,440th in the world, 319th in Asia, and 2nd in Bangladesh. The university's QS Engineering and Technology ranking improved from 305th in 2024 (scoring 64.5/100), having been 185th in 2022.

Campus and Facilities Overview

BUET's campus is located in the heart of Dhaka city, occupying approximately 76.85 acres (311,000 m²) of land, with the academic area confined to about 30.24 acres defined by Shahid Sharani, Bakshi Bazar Road, and the Asian Highway. The campus features a compact layout with halls of residence within walking distance of academic buildings. Major academic buildings include the Civil Engineering Building, the EME (Electrical and Mechanical Engineering) Building, the ECE (Electrical and Computer Engineering) Building, the Chemical Engineering Building, the Architecture Building, the Old Academic Building, and the Administrative Building (Academic Council Building). The campus has eight residential halls for students: Dr. M. A. Rashid Hall, Ahsan Ullah Hall, Titumir Hall, Sher-e-Bangla Hall, Suhrawardy Hall, Nazrul Islam Hall, Shahid Smriti Hall (for postgraduate students and junior teachers), and Chattri Hall (the only female students' hall, also known as Sabequn Nahar Sony Hall). Newer halls include Bangamata Sheikh Fazilatunnesa Mujib Hall. The campus can house approximately 5,000 students, though demand exceeds supply. The campus includes the Vice-Chancellor's residence, two residential areas for faculty (Dhakeshwari and Bakshibazar), staff quarters, a central cafeteria, a teacher's club, two mosques, a medical center (24/7), a post office, a bank, a gymnasium, a central sports field, and multiple playgrounds for cricket, football, and basketball. The auditorium complex was built in 1983 and hosts academic and cultural events. The campus features the BUET Central Library (housing over 132,000 volumes and 218 current periodical subscriptions), and each department has its own library. The campus is connected worldwide through the internet via submarine cable and

its own VSAT. The university has a Vision 2035 plan for campus regeneration that aims to create a sustainable, car-free, pedestrian-friendly campus with reduced ecological footprint.

Scholarships and Financial Aid Overview

BUET offers numerous scholarship and financial aid opportunities to support its students. Every BUET student receives a technical scholarship of approximately Tk 4,000-5,000 per year from the government. Board scholarships ranging from Tk 5,050 to Tk 10,000 per year are available for high-performing students. The BUET Technical Scholarship is provided annually to all eligible students. For foreign postgraduate students, BUET established the PG Fellowship for Foreign Students in 2020, providing a monthly stipend of BDT 30,000 for MSc and PhD students (10 fellowships awarded annually), covering the full period of study. This fellowship includes tuition fee waiver and monthly living allowance. The Higher Education Commission of Pakistan has announced fully-funded scholarships for Pakistani students to study at BUET (2026 cycle), covering full tuition, accommodation, living expenses, and other academic expenses. The government of Bangladesh also provides scholarships for SAARC country students through bilateral agreements. BUET students are also eligible for various external scholarships including Commonwealth Scholarships, Fulbright Scholarships, and Japanese government (MEXT) scholarships for postgraduate studies abroad. The university's Department of Civil Engineering publishes notices for Technical Scholarships periodically. BUET's extremely low tuition fees effectively mean that all students receive an implicit scholarship, with the government subsidizing over 95% of the true cost of education. The total scholarship disbursed covers a significant portion of the student body.

Notable Features

BUET is renowned as the premier engineering institution in Bangladesh and has produced some of the most influential engineers, architects, and planners in the country's history. The most famous alumnus is Fazlur Rahman Khan, the father of tubular skyscraper design, who designed the Sears Tower (Willis Tower) and John Hancock Center in Chicago and is considered the 'Einstein of structural engineering' and the 'Greatest Structural Engineer of the 20th Century'. Other notable alumni include National Professor Dr. Jamilur Reza Choudhury (internationally recognized civil engineer, designer of Coull and Choudhury's Method for shear wall analysis, former Adviser to the Caretaker Government, and Technical Adviser for the Padma Bridge), Dr. Muhammad Ataul Karim (IEEE Fellow, Provost of University of Massachusetts Dartmouth), Dr. A.K.M. Fazle Hussain (recipient of highest awards from American Physical Society, ASME, and AIAA), and Marina Tabassum and Kashef Mahboob Chowdhury (both winners of the Aga Khan Award for Architecture in 2016). BUET graduates designed the National Martyrs' Memorial (Syed Mainul Hossain), the Mausoleum of Sheikh Mujibur Rahman (Ehsan Khan), and many of Bangladesh's major infrastructure projects. BUET established the Department of Computer Science and Engineering in 1984 as the first of its kind in Bangladesh. The university is home to the 4IR Advanced Research and Innovation Park, a state-of-the-art research facility inaugurated in June 2024 encompassing AI, robotics, advanced manufacturing, IoT, nanotechnology, and green energy research. BUETEN (BUETian Entrepreneurs Network) promotes entrepreneurship among students and alumni. The university's Accident Research Institute is one of the few specialized accident research centers in South Asia.

Course Details and Credit Costing

At BUET, undergraduate engineering programs require a minimum of 157 credit hours, and the BArch requires 190 credit hours. For local Bangladeshi students, the cost per credit is heavily subsidized. Course fees for regular postgraduate programs are Tk 100 per credit, while for engineering master's programs the course fee is Tk 500 per credit. For the full BSc Engineering degree (4 years), total costs range from Tk 20,000 to Tk 35,000. Hall accommodation costs Tk 13,000-14,000 per year, with monthly meals around Tk 1,500. Semester fees are Tk 274-300. Annual academic fees are Tk 2,000-4,000. For foreign students (non-SAARC), the admission fee is \$200 USD and course registration fee is \$50 USD per credit hour. For a typical 157-credit BSc program, a foreign student would pay $\$200 + (157 \times \$50) = \$8,050$ USD in tuition over 4 years, plus additional fees at local rates. For SAARC country students, fees follow Bangladesh government regulations (similar to local students). For postgraduate programs, local students pay Tk 500 admission fee, Tk 500 registration per semester, and Tk 100-500 per credit. Foreign PG students on the BUET fellowship receive BDT 30,000 monthly stipends. The approximate total cost of living for a student (food, lodging) is \$100 USD per month. Total cost over 4 years for a local student in hall accommodation is approximately Tk 1,00,000-1,50,000 (\$1,000-\$1,500 USD).

Faculty Information

BUET has approximately 500+ faculty members across its five faculties. The current Vice-Chancellor is Professor Dr. Ekramul Huque (appointed as the 16th VC in May 2026), a distinguished civil engineer who began his teaching career at BUET as a lecturer in 1989 and has served as Director of BRTC. The Pro-Vice Chancellor is Professor Dr. Abdul Hasib Chowdhury. Notable faculty members (past and present) include Professor Dr. Jamilur Reza Choudhury (National Professor of Bangladesh, Coull and Choudhury's Method for shear walls, former VC of BRAC University and University of Asia Pacific, Technical Adviser for Padma Bridge, recipient of Ekushey Padak 2017 and Order of the Rising Sun from Japan), Professor Dr. M. A. Rashid (first VC of BUET), Professor Dr. Satya Prasad Majumder (14th VC), Professor Dr. Saiful Islam (13th VC, FIEEE, FIET, PhD from Cambridge), Professor Dr. M. Rezwan Khan (Distinguished Lecturer of IEEE), Professor Dr. Muhammad Anisuzzaman Talukder (Founding Director of RISE, UNESCO Chairholder), Professor Dr. A.F.M. Saiful Amin (Gold Medalist, Alexander von Humboldt Fellow, first Bangladeshi to receive JSCE International Collaboration Award), Professor Dr. Abul Hasnat (world-famous bridge engineer, designer of Dhaleswari Bridge), Professor Dr. M. Feroze Ahmed (collaborated with MIT on arsenic contamination research), Professor Dr. Mohammad Shariful Islam (Director of RISE), Professor Dr. Shazzad Hosain (convenor of BUETEN Summit), and Professor Dr. A. K. M. Masud (Director of Student Welfare). Many BUET faculty have PhDs from top global universities including Cambridge, MIT, University of Tokyo, University of Southampton, Texas A&M, and others. Faculty members actively publish in top international journals and hold patents.

Scholarships (Detailed)

BUET provides comprehensive scholarship support to its students. The cornerstone is the Technical Scholarship provided by the Bangladesh Government to all eligible BUET students, approximately Tk 4,000-5,000 annually. Board Scholarships from the Dhaka Education Board and other boards range from Tk 5,050 to Tk 10,000

per year based on SSC/HSC results. For foreign postgraduate students, the BUET PG Fellowship (established 2020) is a flagship program providing monthly stipends of BDT 30,000 to 10 awardees annually (MSc/PhD), covering full period of study with a requirement to submit semester progress reports. The fully-funded scholarship for Pakistani students through HEC Pakistan covers full tuition, accommodation, living expenses, and other academic costs for undergraduate engineering and architecture programs at BUET, with the application deadline of January 16, 2026. The Bangladesh Scholarship Program (SAARC-BUET) provides tuition and fees as per government regulations for SAARC country students. Non-SAARC foreign students have access to the \$200 admission fee/\$50 per credit fee structure which is still highly subsidized. Individual departments offer specific scholarships - for example, the Department of Civil Engineering publishes Technical Scholarship notices periodically. The university also administers the F.R. Khan Scholarship named after Fazlur Rahman Khan. Students also access external scholarships such as Commonwealth Scholarships, Fulbright Program, Japanese Government (MEXT) Scholarships, DAAD Scholarships, and Erasmus Mundus for international study. BUET's inherently low fee structure means all students effectively receive a massive government scholarship covering the vast majority of the true cost of their education.

Student Numbers

BUET has approximately 5,500 students enrolled in undergraduate and postgraduate programs. Around 1,500 students are admitted at the undergraduate level each year (1,309 total seats for the 2025-26 session). In master's and PhD programs, approximately 1,000 graduate students are accepted annually. For the 2025-26 admission test, 10,351 students were selected to sit for the test, with 9,051 actually appearing (87.44% participation rate), comprising 7,644 male and 2,707 female students. The gender distribution heavily favors male students, with females comprising approximately 15-18% of the student body. The university has dedicated female halls (Chattri Hall/Sabequn Nahar Sony Hall) with capacity for approximately 450 students, though a smaller new hall has been added. Total residential capacity across 8 halls is approximately 5,000 students. About 500 faculty members serve the university. International students are limited to 26 seats per year at the undergraduate level, with a maximum of 10 students from a single country and 5 in a single department. The university maintains a strict merit-based admission system.

Research

BUET is the leading engineering research university in Bangladesh. The university houses multiple research institutes and centers including the Institute of Water and Flood Management (IWFM), the Institute of Information and Communication Technology (IICT), the Institute of Nuclear Power Engineering (INPE), the Accident Research Institute (ARI), the BUET-Japan Institute of Disaster Prevention and Urban Safety (JIDPUS), and the Research and Innovation Centre for Science and Engineering (RISE). The 4IR Advanced Research and Innovation Park, inaugurated in June 2024, is a state-of-the-art facility housing nine specialized laboratories: the Nanoscale Characterization Laboratory, Nanofabrication Laboratory, Wearable Technologies Research Laboratory, IoT Research and Innovation Laboratory, Applied Artificial Intelligence Research Laboratory, Next Generation Telecom Research Laboratory, Green Energy Research Laboratory, Intelligent Systems Automation and Control Laboratory, and Electric

Vehicle Research Laboratory. The Department of Civil Engineering has four divisions (Structural, Environmental, Transportation, Geotechnical) with extensive laboratory facilities including a Transportation Engineering Lab, Traffic Engineering and GIS Lab, and Geotechnical Engineering Lab. The BioInnovation Research Group in BME works on chronic wounds, smart drug delivery systems, antimicrobial resistance, and skin regeneration. The university undertakes research sponsored by UN organizations, the Commonwealth Foundation, the Association of Commonwealth Universities, UGC, and various industry partners including GPH Ispat and Meghna Group of Industries (MGI). BUET has fiber optic backbone connectivity and VSAT for global research collaboration. The university publishes four research journals. Research focus areas include water resources and flood management, disaster risk reduction, arsenic contamination, renewable energy, artificial intelligence, robotics, structural engineering, and materials science. Notable research includes collaboration with MIT on arsenic contamination mechanisms in groundwater (Prof. M. Feroze Ahmed). The university has a strong patent filing culture supported by partnerships like the GPH Ispat-RISE collaboration for intellectual property management.

Innovation

BUET is at the forefront of engineering innovation in Bangladesh. The Research and Innovation Centre for Science and Engineering (RISE), founded in 2020 by Prof. Dr. Muhammad Anisuzzaman Talukder, serves as the university's primary innovation hub, linking research and innovation with industry and society. RISE has partnerships with Meghna Group of Industries (MGI) which renovated the RISE Seminar Room, and GPH Ispat Ltd for IP management and patent filing awareness. The BUETian Entrepreneurs Network (BUETEN) hosts an annual summit bringing together students, alumni, entrepreneurs, faculty, industry leaders, and policymakers to promote entrepreneurship. The INNOVISTA idea competition held during BUETEN Summit 2026 featured 57 teams with a Tk 180,000 prize pool. The 4IR Advanced Research and Innovation Park provides state-of-the-art facilities for cutting-edge research in nanofabrication, wearable technologies, IoT, AI, next-generation telecom, green energy, intelligent systems, and electric vehicles. The university has a strong technology transfer mechanism through BRTC (Bureau of Research, Testing and Consultation), which handles industry consulting and testing services. BUET has national-level influence in innovation policy, with faculty members contributing to the National AI Institute proposal, National Scientific Inventory development, semiconductor research facility planning, and AI-driven circular battery ecosystem initiatives. The university's startup ecosystem is growing, with alumni founding successful technology companies in Bangladesh. BUET also contributes to the 'Smart Bangladesh' vision through research in digital transformation, FinTech, and Industry 4.0 technologies. The university has strong collaborations with the Government of Japan (JICA) through BUET-JIDPUS for disaster prevention innovation.

Administration

BUET's governance structure is defined by the Bangladesh Engineering and Technological University Ordinance, 1961. The Chancellor is the President of Bangladesh (ex-officio). The Vice-Chancellor is the chief executive officer - currently Professor Dr. Ekramul Huque (16th VC, appointed May 2026, succeeding Prof. Dr. Abu Borhan Mohammad Badruzzaman). The Pro-Vice Chancellor is Professor Dr. Abdul Hasib Chowdhury. The Registrar

manages academic and administrative records. Previous Vice-Chancellors include Dr. M. A. Rashid (first VC), Dr. Satya Prasad Majumder (14th VC), Dr. Saiful Islam (13th VC, PhD Cambridge), and Dr. S. M. Nazrul Islam (11th VC). The university has five Deans heading each faculty: the Dean of the Faculty of Chemical and Materials Engineering, Dean of the Faculty of Civil Engineering, Dean of the Faculty of Electrical and Electronic Engineering, Dean of the Faculty of Mechanical Engineering, and Dean of the Faculty of Architecture and Planning. The Academic Council is the supreme academic body, and the Syndicate handles executive functions. The Finance Committee oversees the budget. Each department has a Head (Chairperson). Institutes are headed by Directors. The Director of BRTC, Director of Student Welfare, Controller of Examinations, and Director of the Central Library are key administrative positions. The BUET Admission Committee handles the annual admission process. The university's governance was reformed under Ordinance XXXVI of 1961 which established it as a university of engineering and technology with teaching, examination, and degree-granting powers.

News

Recent major developments at BUET include: In May 2026, Prof. Dr. Ekramul Huque was appointed as the 16th Vice-Chancellor of BUET, officially taking charge on May 15, 2026, for a four-year term. In January 2026, BUET published the admission test results for the 2025-2026 academic session with 9,051 candidates appearing and 1,309 seats available. The BUETEN Summit 2026 was held on January 23-24, 2026, featuring INNOVISTA 2026 idea competition with 57 teams and Tk 180,000 prize pool, along with panel discussions on AI, indigenous machinery manufacturing, and alumni networks. The 4IR Advanced Research and Innovation Park was inaugurated on June 2, 2024, featuring nine specialized research laboratories. GPH Ispat Ltd signed a strategic partnership with RISE for intellectual property management and patent filing. Meghna Group of Industries (MGI) renovated the RISE Seminar Room at BUET, inaugurated on January 24, 2026. BUET was ranked 282nd globally in Engineering and Technology in QS Subject Rankings 2026. In the QS World University Rankings 2026, BUET was placed in the 761-770 bracket, maintaining its position as the second-best university in Bangladesh. A BUET professor was appointed to high-level government advisory roles. BUET announced plans to be developed as a world-class research hub per government commitment. The university also made news for its Vice-Chancellor Prof. Dr. Abu Borhan Mohammad Badruzzaman's tenure ending and Prof. Dr. Ekramul Huque taking charge. BUET continues to maintain its position as Bangladesh's top engineering university with 87.44% participation rate in the 2025-26 admission test indicating strong national demand.

Additional recent news for BUET includes that on May 15, 2026, Prof. Dr. Ekramul Huque officially took charge as the 16th Vice-Chancellor. In June 2024, the 4IR Advanced Research and Innovation Park was inaugurated with nine state-of-the-art laboratories. In March 2026, BUET was ranked 282nd globally in Engineering and Technology by QS Subject Rankings. In January 2026, the BUETEN Summit 2026 was held with INNOVISTA competition and multiple panel discussions. The university signed an MoA with GPH Ispat Ltd for intellectual property management and patent filing awareness. MGI renovated the RISE Seminar Room at BUET. In the QS World University Rankings 2026, BUET maintained its 761-770 position. The government committed to developing BUET as a world-class research hub. BUET's undergraduate admission for 2025-26 saw 10,351 students shortlisted and 9,051 appearing in the January 10, 2026 test. The new VC outlined plans for increased research funding and

international collaboration. BUET continued to play a leading role in national infrastructure development, with faculty serving as technical advisers for major projects including the Padma Bridge. The university's Vision 2035 regeneration plan aims to create a sustainable, car-free campus. BUET also hosted orientation programs for new students with government officials addressing the importance of engineering education for national development.

Help Desk and Student Services

BUET provides comprehensive student support services. The Directorate of Student Welfare handles student affairs, counseling, and extracurricular activities. The Proctor's Office manages discipline and campus security. Each residential hall has a Provost and Assistant Provosts who address student welfare, accommodation issues, and provide 24/7 support. The Medical Centre provides basic healthcare services with qualified doctors available around the clock. The university has a Counseling Service for students facing academic or personal challenges. The Registrar's Office handles academic records, certificates, transcripts, and enrollment verification. The Examination Control Office manages exam schedules, results, and academic appeals. The Central Library offers reference services, digital resource access, and study spaces. The IT Help Desk provides technical support for network, email, and online services. The Career Guidance and Placement Center assists with job placement and internship opportunities. The BUET website (www.buet.ac.bd) and the admission portals provide online services. The Public Relations Office handles media inquiries and public communications. International students can seek assistance from the Registrar's Office for visa and immigration matters. The university also maintains a Transport Office for bus services, a Housing Office for staff quarters, and a Security Office for campus safety. Individual departments provide academic advising through faculty advisors assigned to each student.

Alumni

BUET's alumni network is one of the most influential professional networks in Bangladesh and globally. The most illustrious alumnus is Fazlur Rahman Khan (alumnus of Ahsanullah Engineering College, which became BUET), considered the 'father of tubular designs' for skyscrapers. He designed the Willis (Sears) Tower and John Hancock Center in Chicago, and is celebrated as the 'Einstein of structural engineering' and 'Greatest Structural Engineer of the 20th Century.' He received the Independence Day Award, Bangladesh's highest state award. Other notable alumni include National Professor Dr. Jamilur Reza Choudhury (civil engineer, former VC of BRAC University, Technical Adviser for Padma Bridge, Ekushey Padak and Order of the Rising Sun recipient), Dr. Syed Mainul Hossain (architect of National Martyrs' Memorial, Ekushey Padak 1987), Marina Tabassum and Kashef Mahboob Chowdhury (Aga Khan Award for Architecture 2016 winners), Ehsan Khan (architect of Mausoleum of Sheikh Mujibur Rahman), Dr. A.K.M. Fazle Hussain (University of Houston, recipient of highest APS and ASME awards), Dr. Muhammad Ataul Karim (IEEE Fellow, UMass Dartmouth Provost), Dr. M. Rezwan Khan (IEEE Distinguished Lecturer), Dr. Latifur Khan (tenured professor at UT Dallas), Dr. Mosharaf Chowdhury (co-creator of Apache Spark, University of Michigan), Abul Hayat (National Film Award-winning actor), Anisul Hoque (renowned writer and journalist), Aupee Karim (National Film Award-winning actress and architect), and numerous Vice-Chancellors of other universities. BUET alumni have founded major engineering firms, technology companies, and consultancies in Bangladesh and abroad. The BUET Alumni Association maintains

strong ties globally with chapters in North America, Europe, Middle East, and Asia. BUETEN (BUETian Entrepreneurs Network) specifically connects entrepreneurial alumni. The alumni network is estimated at over 50,000 graduates spanning 150+ years of institutional history.

Campus

BUET's campus is located in the Palashi area of central Dhaka, occupying approximately 76.85 acres. The campus is compact with academic buildings, residential halls, and administrative buildings all within walking distance. Major academic buildings include the Civil Engineering Building (constructed 1968, extended 1992), the EME Building (1984), the ECE Building (newer, housing EEE, CSE, and BME departments), the Chemical Engineering Building, the Architecture Building, the Old Academic Building, and the Academic Council Building (1993). The campus features eight student residential halls: Dr. M. A. Rashid Hall (the main hostel that initially served as the administrative office), Ahsan Ullah Hall (built 1958), Titumir Hall (originally Kayedi Azam Hall), Sher-e-Bangla Hall, Suhrawardy Hall (originally Liakot Hall), Nazrul Islam Hall, Shahid Smriti Hall (for postgraduate students and junior teachers, completed 1978, opened 1979), and Chattri Hall (the first girls' hall, inaugurated 1986). There are also teacher quarters in Dhakeshwari and Bakshibazar residential areas, and staff quarters. The campus also includes the Central Library (built 1975, housing over 132,000 volumes), the Auditorium Complex (built 1983), the Vice-Chancellor's bungalow, the BUET Club, a teacher's club, two mosques, a post office, a bank, a medical center, a central sports field, a gymnasium, and a cafeteria. The BUET-Japan Institute of Disaster Prevention and Urban Safety (JIDPUS) is located in the Palashi campus with a multi-storied academic building. The campus has optical fiber cable backbone network and VSAT connectivity. Notable landmarks include the main gate area, the central field, and the Shahid Minar. The campus has a Vision 2035 plan for regeneration, aiming to become car-free and pedestrian-friendly with increased open space (from 47.16 to 50.76 acres), improved drainage, and new academic and residential buildings. Green spaces include the central field, the courtyard of Chattri Hall, and landscaping around halls. The campus faces challenges including traffic congestion from the surrounding city, limited parking, and aging infrastructure.

Transport

BUET's compact campus makes it highly walkable, with all academic buildings and residential halls within walking distance. The university provides transport services for students commuting from outside the campus. The university is located in the Palashi area, with excellent connectivity to the rest of Dhaka via the Asian Highway, Shahid Sharani, and Bakshi Bazar Road. The Dhaka Metro Rail has significantly improved access to the campus area. The university plans to establish a car-free zone covering the main campus area, West Palashi campus, and parts of the Asian Highway, restricting automobile traffic and promoting bicycle and pedestrian movement. Central university transport parking is planned to be relocated to the north side near BUET field. The Vision 2035 plan proposes enhanced transport facilities with additional routes and morning/evening services. Currently, the campus has designated parking areas, though inadequate parking is a known issue that the master plan aims to address. On-campus automobile vehicle parking will eventually be removed per the regeneration plan. Bicycles will be allowed in the

car-free zones. Proper road signs, markings, and regulatory systems are planned to ensure a well-maintained pedestrian-friendly environment.

Library

BUET Central Library, built in 1975, is one of the most comprehensive engineering and technology libraries in Bangladesh. The library houses a collection of over 132,000 physical volumes and subscribes to 218 current periodical subscriptions. It provides access to major engineering databases including IEEE Xplore, ASCE Library, ASME Digital Collection, ScienceDirect, Scopus, Web of Science, and other leading academic databases. The library has a Seminar Library complex with digital resources and dedicated study spaces. Each department maintains its own specialized departmental library - for example, the Civil Engineering Library on the third floor of the Civil Engineering Building has a specialized collection of ASCE, ACI journals, conference proceedings, design manuals, and theses. Hall libraries are also available in each residential hall. The Civil Engineering Library is open for reference for all postgraduate students on all workdays with a recess from 1:00 PM to 2:30 PM. The Central Library has implemented a digital library system with online catalogue access. The library serves faculty, researchers, students, and staff. The library collection covers all branches of engineering, architecture, planning, mathematics, physics, chemistry, and humanities. The university has invested in digital infrastructure with fiber optic backbone network connecting all departments and the library.

Career Opportunities

BUET graduates are among the most sought-after professionals in Bangladesh and globally. The university's strong academic reputation and rigorous training ensure excellent placement rates. The Directorate of Student Welfare and individual departments organize career counseling sessions, resume workshops, and placement drives. Major recruiters of BUET graduates include multinational corporations (Unilever, Nestlé, HSBC, Standard Chartered, Chevron, Shell), leading Bangladeshi conglomerates (Square Group, Beximco, Walton Group, PRAN-RFL, Bashundhara Group), engineering and construction firms (Concord Group, MAX Group, Navana Group), technology companies (Google, Microsoft, Samsung, Huawei), banks and financial institutions, government agencies (Public Works, Roads and Highways, Power Division, Water Development Board), and international development organizations (World Bank, UNDP, ADB). BUET's strong alumni network provides significant career advantages through networking, mentorship, and referrals. Many BUET graduates pursue advanced degrees at top global universities including MIT, Stanford, Cambridge, Oxford, University of Tokyo, and ETH Zurich. The university's career services include the BUETEN (BUETian Entrepreneurs Network) which connects entrepreneurial alumni and supports startups. BUET graduates also have strong representation in academia, with many becoming faculty members at leading universities worldwide. The university's 4IR and innovation parks also facilitate internships and research collaborations with industry partners. The extensive alumni network of over 50,000 professionals provides lifelong career support.
